		Unblock

- (5) Create "T2_Upd" folder then unzip the .zip file.
- (6) Copy "T2_Upd" folder into a USB stick.
- (7) Connect both keyboard and mouse to the T2.

2. Upgrade the software

- (1) Whilst pressing [SHTL/JOG] and [VAR] buttons, and turn on the T2.
- (2) Once both buttons lit on, release the buttons
- (3) Choose [Start] > [My Computer] and open "T2_Upd" folder in the USB stick.
- (4) Double-click "T2_4K_Updater.exe". Software upgrade will proceed.
- (5) If below screen appears, click [Install] button.

- (6) Click [Yes] button in restart required dialog box to launch file update. T2 will restart in maintenance mode. NOTE: If you click [No] button, you need to restart in maintenance mode manually before starting the T2 in Command Center mode. If the step is skipped, the T2 may not work properly.
- (7) Restart the T2 in Command center mode.
